New Product Lanch

ExacqVision M-Series

Tyco Security Products introduces the new exacqVision M-Series, a cost effective network video recorder that is easy to install and use. The exacqVision M-Series expands the All-in-One Recorder category Exacq launched last March with the LC-Series PoE+ recorder. Similar to the higher-capacity, higher PoE power LC-Series, the M-Series includes integrated PoE camera ports and the feature-rich exacqVision START video management software, which can easily be upgraded to the Professional or Enterprise software.

Users can connect up to eight IP cameras per recorder and can view and administer live and recorded video directly from the recorder using the included exacqVision client or remotely using a web browser or exacqVision client on a separate computer. The free Exacq Mobile app also allows users to view live and recorded video on iOS or Android mobile devices.

Features:

- All-in-One Recorder—Easiest to Quote, Install & Service
- Camera Power Management
- Easy Connect
- View Video Anywhere with Free Client Software
- View and manage servers from Windows/Linux/MAC PCs with free client software
- View live and recorded video in any browser
- View live and recorded video on iOS or Android mobile devices with free application
- 3-Year Warranty & Software Updates.

C•CURE Go Reader

The Ultimate in Portable and Remote Security

The innovative C•CURE Go Reader extends the reach of your C•CURE 9000 system more powerfully than ever before. An inspired evolution of the C•CURE Go mobile app, C•CURE Go Reader lets you grant or deny access in even the most remote, disconnected areas.

Using your Android device, C•CURE Go Reader pairs with a multi-technology read head to mimic a full-fledged iSTAR door, complete with schedules, clearances and holidays.

Features:

- Powerful, portable C•CURE 9000 security on an Android device
- Supports iSTAR controller functionality –grant or deny access based on card status, schedules, clearances and holidays
- Roll call feature makes sure emergency evacuations run smoothly
- All activity logged in the C•CURE 9000 journal
- Can operate in offline mode with cached database
- Multi-technology read head supports iCLASSTM, MIFARE and proximity cards
- Available for free on Google Play for Android devices

Tyco Security Products Professional Services

Personalized Service to Improve Efficiencies and Profitability

Introducing Tyco Security Products Professional Services, a full collection of customer-focused services that take an already exceptional product line and turn it into something unique, special and... well, smart.

Our Professional Services Engineer will work with you to understand the results you are looking for, and then develop reports, modify applications and configure servers, or do anything it takes to unlock the full potential of your system and optimize it for the best possible performance.

Comprehensive System Assessment

Our professionals will look deep inside your system to obtain critical information that will help pave the way to an efficient and effective solution.

System Upgrades

Work with us to easily bring your system up to date with new features and functionality. We can work with you remotely or come to your site for a fast and painless upgrade process.

System Migrations

Technology moves fast. Our professionals will work with you to create a clear migration path from one system to another.

Personnel Replication

For sites with hundreds of thousands of personnel records, our experts will ensure a smooth migration of critical data associated with each personnel record - with minimal possible downtime.

Business Intelligence Reporting

Your business has information about people, policies, ideas and money. We will provide a way for you to properly harvest, organize and manage your data.

For more information's on BIRS Reporting Suite (Datasheet) please click [Here](#)

Customized Solutions

We have great products, but we know every customer has unique requirements. Leveraging our products' open source technology, our Professional Services specialists can unlock the huge potential of your system.

New Illustra Video Analytics:

World-class security solutions to protect your homes, shops and offices

IMPASSA Security System

Peace of mind in one small package • Quick professional installation
• Blends into home decor • Instant connection to emergency response • Easy to use

Control your System with Ease

Through the compact and sleek keypad, you control your security system with easy to use one-touch keys. The system can also be managed with a wireless key. It really is that easy!

Peace of Mind with IMPASSA

You want to do everything you can to protect your family and your home. A security system from DSC keeps a watchful eye on your family and other valuables when you are home and even when you aren't.

It's peace of mind in one package. IMPASSA, the all-in-one security system from DSC, is so easy to use and has all the performance you need to protect what matters most.

What Wireless Means for You

Because the system is wireless, it installs quickly with minimal compromise to your home structure. Faster, easier installation means less installer time as well -- so you can get on with the business of your day.

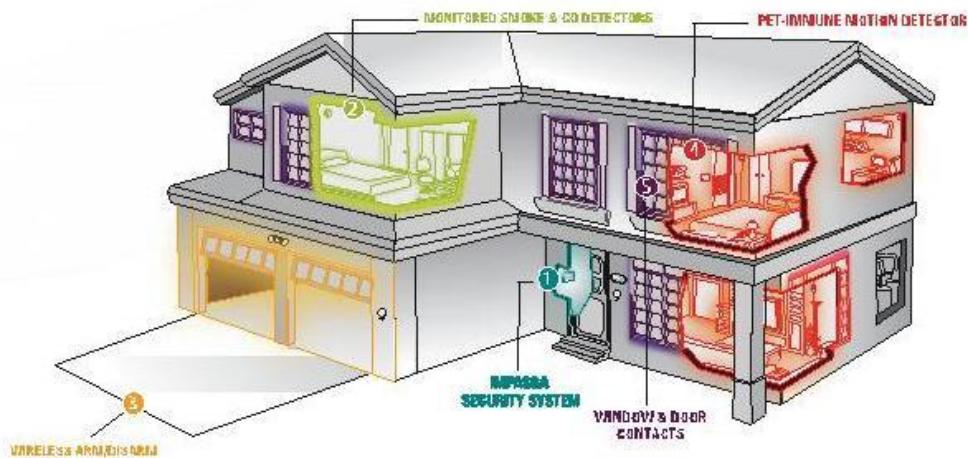

Contemporary Design Blends into Décor

With a sleek and contemporary look, all DSC security devices project a modern feel and at the same time, inconspicuously blend into your home décor.

Instant Connection, With Back-Up, to Emergency Response. When an alarm occurs, a monitored IMPASSA Security System instantly connects to a monitoring station and emergency services are dispatched as required. For extra peace of mind, IMPASSA offers a two way voice feature -- instant communication with your monitoring station. You can talk to a live operator who will dispatch emergency services as required. If an alarm has been activated, the system provides a listening feature enabling the monitoring station to assess the situation in your home. The listen-in feature is only active when the alarm is triggered.

Someone to Watch over You

DSC's IMPASSA Security System keeps watch, providing you and your family security without compromise. Rest easy, knowing that IMPASSA keeps peace of mind, top of mind. Control your System with Ease. Through the compact and sleek keypad, you control your security system with easy to use one-touch keys. The system can also be managed with a wireless key. It really is that easy!

Events and Exhibitions:

Tyco sponsors Data Center Technologies Summit-Conference and Exhibition 2016, Bangladesh.

Tyco security products was one of the sponsors of the Data Center Technologies Summit-Conference and Exhibition on 2nd and 3rd of December, 2016 in Dhaka, Bangladesh. Data Center Technologies summit was a two day conference and exhibition organized for the data center industry associates. The main aim of the event was to bring all the data center industry's leading experts associates, young IT professionals, students, Engineers together under single umbrella.

Tyco security products was associated as a silver sponsor in this event and had a dedicated booth showcasing its advanced security solutions consisting of Video surveillance solutions, Access controls and Intrusion products. The two day exhibition saw a customer footfall of over 800 customers visiting the Tyco booth. Tyco also give a formal presentation on its solutions for Data center during the conference
