

Introducing the Illustra Fixed & Varifocal Multisensor Cameras

Johnson Controls is excited to unveil the Illustra Fixed & Varifocal Multisensor Cameras, designed to revolutionize surveillance with intelligent wide-area coverage and adaptable deployment options. These cameras are engineered to meet the diverse needs of security professionals, offering a powerful solution for comprehensive monitoring.

Key Features and Benefits:

- **High-Resolution Coverage:** Equipped with four synchronized 5MP sensors, these cameras deliver a total of 20MP resolution. This ensures expansive scene capture with precision and clarity, reducing the need for multiple single-sensor cameras.
- **Flexible Deployment Options:** Choose between fixed lens models for consistent coverage or motorized varifocal models for precise zoom and focus. This flexibility allows for tailored deployments across various environments.
- **Advanced AI Video Analytics:** Integrated AI analytics enhance monitoring capabilities with advanced object classification, intelligent rules and proactive alerting. This empowers security teams to improve situational awareness and operational efficiency.
- **Exceptional Low-Light Performance:** With Smart IR technology, these cameras perform exceptionally well in low-light conditions, ensuring reliable surveillance around the clock.
- **Rugged and Secure Design:** Built to withstand demanding indoor and outdoor locations, the cameras feature IP66 IP67 weather ratings, IK10 vandal resistance and cybersecurity aligned with ISA IEC 62443 standards.

The Illustra Multisensor Cameras offer security teams the opportunity to design smarter systems, reduce complexity and capture critical details without compromise. With their robust features and innovative technology, these cameras are an ideal choice for businesses seeking proactive service, superior technology and fast installation.
